Abstract:
Archaeological investigations in the Melvern Reservoir, Osage County, Kansas were carried on as part of the Inter-Agency Archaeological Salvage Program in the Missouri Basin under a cooperative agreement between the University of Kansas and the United States National Park Service and in collaboration with the Missouri Basin Project of the Smithsonian Institution. From June 14 to August 2, 1962, excavations were carried on under the direction of Carlyle S. Smith at the Turkey Creek Site (14OS1), the Harsch Site (14OS314), the Wiley Site (14OS312), and the Judy Hammond Site (14OS4). Surface collections were gathered from sites 14OS2, 14OS3, 14OS313, 14OS315, 14OS316, and 14OS318 (from Carlyle Smith’s forward to Archaeological Investigations in Melvern Reservoir, Osage County, Kansas, 1962).

Carlyle Smith’s work as the principle investigator produced the correspondence, field notes, and manuscripts included in this collection.

Biographical Name: Carlyle S. Smith

Biographical Note: Carlyle Smith was born in 1915 in Great Neck, New York. He received his PhD from Columbia University where he trained under William Duncan Strong and was initially exposed to Plains archaeology. He joined the University of Kansas faculty in 1947 as an assistant professor with the Department of Anthropology and Sociology and assistant curator with the Natural History Museum. His fieldwork spanned 1938 to 1975 and included investigations in New York, South Dakota and Kansas, Easter Island and the Marquesas. During excavations in South Dakota, he developed an expertise in the identification of gunflints and gun parts. Carlyle Smith’s fieldwork and research significantly added to the collections at KU while his contribution to teaching prepared many students for a professional career in Anthropology. His leadership was a significant contribution to the development of a separate department of Anthropology in 1962 and the creation of the Museum of Anthropology in 1976.
