

Explore the museum through Science Scoops – Haiku. Each poem has three lines consisting of 5, 7 and 5 syllables, respectively. Can you identify the subjects of these poems?

### Fourth Floor (Panorama)

Spreading up a tree  
Wrapping round to reach the light  
Choking plant species

Comic book hero  
An Arctic tundra weasel  
Stocky, strong and short

Speedy desert bird  
Vex Wile E Coyote  
Beep, beep, zoom away

When it gets too cold  
I grow qiviut, eight times  
Warmer than a sheep!

### Third Floor (Fossil Galleries & Bugtown)

Aquatic diver  
Flightless bird with wings reduced  
Penguin I am not

Minerals a glow  
Bright yellow you fluoresce  
Eerie glowing light

Shoo and swat away  
A summer time feast of blood  
Piercing, sucking mouth

### Fifth Floor (Explore Evolution)

Nostrils at the tip  
Thick bulbs of bone cover my ears  
Walking early whale

Partnership of four  
Mutual relationship  
Fungus, ant and more

Small beaks, big beaks too  
Study of these island birds  
Selection and seeds

### Sixth Floor

Pronuba larvae  
Live and grow in the flowers  
Adult moths pollinate

Darwin was on board  
Naturalist and journal  
Voyage on this ship

Thought to be of parts  
Not part duck nor oddity  
Australian mammal

Slithers on the ground  
No legs, no udders, no moo  
Its stripes black on red

Answers: Strangler fig, wolverine, roadrunner, Musk ox, *Hesperornis*, scapolite, mosquito, *Pakicetus*, coevolution, Galapagos finches, Yucca, Beagle, platypus, milk snake (*Lampropeltis triangulum*).
